

# TCD SERIES

## DLA 04051 & COTS-Plus

The TCD family is a DLA 04051 / COTS-Plus conductive polymer series designed for use in demanding applications requiring very low ESR with stable, high frequency CAP retention and longer life performance. The series exhibits improved basic reliability of 0.5%/1000hrs at 85°C, and capacitors are designed to withstand biased humidity testing at 85°C/85% R.H. for at least 500 hours. Capacitors are rated for operation up to 125°C and additional surge current screening at -55°C and 85°C optional upon request.

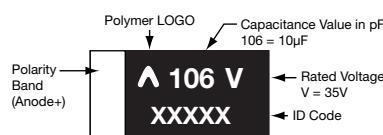

### FEATURES

- Statistical electrical screening
- Surge testing level options
- Humidity 85°C/85%R.H., Vr, 500 hours
- -55°C to 125°C operation temperature
- DCL 0.1 CV
- Testing Option A, B
- Life Test at 125°C for 2000 hours
- Vibration
- Surge Voltage & RTSH

### CASE DIMENSIONS: millimeters (inches)

All technical data relates to an ambient temperature of +25°C. Capacitance and DF are measured at 120Hz, 0.5V RMS with a maximum DC bias of 2.2 volts. DCL is measured at rated voltage after 5 minutes.

**NOTE: KYOCERA AVX reserves the right to supply a higher voltage rating or tighter tolerance part in the same case size, to the same reliability standards.**

## RECOMMENDED DERATING FACTOR

Voltage and temperature derating as percentage of V<sub>r</sub>.

Rated voltage	Operating Temperature		
	≤85°C	105°C	125°C
≤10V	90%	90%	60%
≥16V	80%	80%	54%
